ABSTRACT

This study sought to find out perceptions that primary school teachers have on their training and preparation in classroom questioning skills in primary teachers’ colleges of education. The study was guided by the following questions: i) what are the perceptions primary school teachers have on their training and preparation in classroom questioning skills in primary teacher colleges of education? ii) What type of classroom questioning do teachers prefer using in their classrooms? iii) Is there a relationship between the teacher’s initial training and preparation in primary teachers’ colleges of education and the type of classroom questioning they prefer using in classrooms?

A descriptive survey research design was deployed. The study comprised 100 serving primary school teachers as respondents and these were chosen using systematic sampling. Questionnaires, semi-structured interviews and observation check list were used to collect data.

The findings of this research indicate that:

i. Serving primary school teachers were of the view that they were not well trained in classroom questioning skills during their pre-service training.

ii. With regard to low-order and high-order questioning, the serving primary school teachers preferred using low-order classroom questioning to high-order classroom questioning.

iii. The type of classroom questioning that primary school teachers used in their classes was related to the way they were trained and prepared in primary teachers’ colleges of education.

The study recommended that there is need for participatory teacher training programmes because in this training model, teachers take an active role in the training process. Training of teachers moves away from being theoretical to being practical. Pre and post service teacher training programmes should focus on training primary school teachers in classroom questioning skills. Teacher Group Meetings (TGMs) should be utilised to improve teacher skills in classroom questioning skills.
DEDICATION

To my inspirational family: Judith, Thabo, Sam and Helen. This chapter of life would have been purposeless without you.
ACKNOWLEDGEMENT

I would like to give thanks to the almighty God for giving me more days, without God I am nothing.

My heartfelt thanks go to my supervisor, Dr. Sophie Kasonde-Ng’andu, for her generous assistance, inspiration, patience and constructive suggestions that made it possible for me to undertake this study.

Thanks to the respondents in Lukulu district I worked with for their assistance and cooperation during this study.

I also acknowledge the assistance and encouragement I received from my fellow Educational psychologist students more especially Kaumba Samwangala, GibsonMweemba and Andrew Zimba.

Finally, I would like to thank my parents, sister, brothers, wife and my three children who needed my financial, physical, spiritual and emotional support but underwent hardships to enable me complete my study.

1.8 Limitation .......................................................................................................... 8
1.9 Theoretical framework....................................................................................... 8
1.10 Operational Definition of terms....................................................................... 10
1.11 Organisation of the study.................................................................................. 10
CHAPTER TWO: LITERATURE REVIEW

2.1. Overview .............................................................................................................. 11
2.2 past and present studies on primary school teachers’ classroom questioning
   skills.................................................................................................................... 11
2.3 The concept of teacher perception................................................................. 12
2.4 Teachers’ classroom questioning skills and its functions............................ 14
2.3 Typology of classroom questioning used by teachers.................................. 17
   2.3.1 Cognitive level......................................................................................... 18
2.4 Teacher training and preparation................................................................. 23
2.5. Relationship between teacher training and preparation and the type of
   Classroom questioning used in classroom.................................................... 26
2.6 Summary ........................................................................................................... 30

CHAPTER THREE: RESEARCH METHODOLOGY

3.1 Overview .............................................................................................................. 32
3.2 Research Design............................................................................................... 32
3.3 Target Population............................................................................................. 34
3.4 Research Sample............................................................................................... 34
   3.4.1 Demography............................................................................................ 34
3.5 Sampling Procedure......................................................................................... 36
3.6 Research Instrument......................................................................................... 37
3.7 Piloting the research instruments................................................................... 39
3.8 Data Collection.................................................................................................. 39
3.9 Data Analysis..................................................................................................... 39
3.10 Ethical Considerations.................................................................................... 40
3.11 Summary .......................................................................................................... 40
CHAPTER FOUR: PRESENTATION OF RESEARCH FINDINGS

4.1 Overview......................................................................................................................41
4.2 Finding from the questionnaires ..............................................................................41
4.2.1. Teachers have heard of classroom questioning skills.............................................41
4.2.2. How teachers heard classroom questioning skills.................................................42
4.2.3. Teachers understood classroom questioning skills...............................................43
4.2.4 How often teachers use classroom questioning skills ............................................44
4.2.5 Teachers not were comfortable with their classroom questioning skills ..............45
4.2.6. Teachers were not adequately trained and prepared in classroom questioning skills in primary teachers colleges .................................................................46
4.2.7. Teachers had heard of low-order and high-order classroom questioning skills ....48
4.2.8. Teachers preferred low-order to high-order classroom questioning skills ............49
4.2.9. Reasons for their preference of low-order to high-order questioning ..................51
4.2.10. The type of classroom questioning used by teachers was related to the training and preparation at colleges of education .................................................................53
4.2.11. Primary teachers colleges of education are not doing enough in preparing and training teachers in classroom questioning skills ...............................................................55
4.3. Findings from classroom observation ......................................................................57
4.3.1. Quantity of classroom questions asked by primary school teachers ....................57
4.3.2. Summary ................................................................................................................58

CHAPTER FIVE: DISCUSSIONS OF FINDINGS

5.1. Overview......................................................................................................................60
5.2. Teachers were not adequately trained and prepared in classroom questioning skills in primary teachers college of education .................................................................60
5.3. Teachers were not comfortable with their classroom questioning skills ..................64
5.4. Teachers had heard or learnt of low-order and high-order classroom questioning skills .................................................................................................................................65
5.5. The type of classroom questioning used by teachers was related to the training at
colleges of education.................................................................70
5.6. Primary teachers colleges of education are not doing enough training
teachers in classroom questioning skills........................................73
5.7. Summary..................................................................................78

CHAPTER SIX: CONCLUSION AND RECOMMENDATIONS

6.1 Overview....................................................................................81
6.2 Summaries...................................................................................81
6.3 Recommendations.........................................................................83
6.4 Suggestions for further research..................................................84
