IN Volvement of Registered Nurses in Clinical Teaching of Nursing Students in Central Hospitals of Malawi

By
Paul Greg Katete

A Dissertation submitted in partial fulfilment of the requirements for the Degree of Master of Science in Nursing at the University of Zambia.

THE UNIVERSITY OF ZAMBIA
LUSAKA

2014
DECLARATION

I, Paul Greg Katete, declare that this Dissertation represents my own work and that all the sources quoted have been indicated and acknowledged by means of complete reference. This Dissertation has not previously been submitted for a Degree, Diploma or any other qualification at this or another University. It has been prepared according to guidelines for Master of Science in Nursing Dissertations of the University of Zambia.

ABSTRACT

Clinical teaching is an active process that occurs in a variety of socio-cultural contexts and is one of the most important components in the training of nursing students. Registered Nurses play an important role in teaching and learning of student nurses. In Malawi, one of the roles of Registered Nurses is to teach student nurses in the clinical area.

The purpose of the study was to determine the involvement of Registered Nurses in clinical teaching of nursing students in Central Hospitals of Malawi. Using a cross sectional study design, data were collected using a self administered questionnaire from a convenient sample of 105 Registered Nurses aged 22-56 years in the Central Hospitals of Malawi. These included Queen Elizabeth, Zomba, Kamuzu and Mzuzu Central Hospitals. Data were analysed using the Statistical Package for Social Sciences software version 20.0. Spearman’s rank correlation coefficient, Chi-Square and Fisher’s Exact were used to test associations among variables.

The study revealed that 69.5% of respondents were involved in clinical teaching of student nurses while 30.5% were not involved. It was also found that 97.1% of the respondents had knowledge of clinical teaching and 97.1% had a low to moderate attitudes towards clinical teaching of student nurses. Majority (61.9%) of the respondents indicated that they had a high workload which affected their involvement in clinical teaching while 38.1% had a low workload. There was a significant positive correlation between involvement in clinical teaching and knowledge of the respondents ($r_s = .381, p<0.01$). However, there was no significant relationship between involvement and attitude, workload and incentives.

Recommendations were made to the Ministry of Health to deploy more Registered Nurses in Central Hospitals of Malawi to ease the workload and allow them to participate in clinical teaching. The Government and Nursing Training Institutions should train more Registered Nurses and Clinical Instructors in pedagogical concepts of clinical teaching and also strengthen skills and simulations, Laboratory methodology to enhance acquisition of clinical skills. Registered Nurses should also be encouraged to participate in clinical teaching.

Key words: Involvement, Registered Nurses, Central Hospitals, Malawi.
DEDICATION

I dedicate this study to the Katete family and Tapiwa who I missed while pursuing my Master of Science in Nursing Degree programme.
ACKNOWLEDGEMENT

This project would not have been possible without the support of many people.

My sincere thanks go to the Ministry of Health in Malawi for sponsoring me to pursue the Master of Science in Nursing Degree programme at the University of Zambia. I wish to also thank my supervisors Mrs M. Makukula and the late Dr P. Mweemba (posthumously) who read my numerous revisions and helped make sense of the confusion.

I thank the University of Zambia for providing the necessary facilities to enable me complete my School.

## CHAPTER ONE

1.0 Introduction ............................................. 1
1.1 Background Information .................................... 1
1.2 Statement of the Problem .................................. 4
1.2.1 Conceptual Framework ................................. 5
1.3 Significance of the Study ................................ 8
1.4 Research Objectives ..................................... 8
1.4.1 General Objective ..................................... 8
1.4.2 Specific Objectives ................................... 8
1.5 Hypothesis ................................................. 9
1.6 Research Questions ...................................... 9
1.7 Variables .................................................. 9
1.7.1 Dependent Variable .................................. 9
1.7.2 Independent Variables ................................. 9
1.8 Conceptual Definition of Terms .......................... 10

## CHAPTER TWO

2.0 Literature Review ....................................... 11
2.1 Introduction ............................................. 11
2.2 Clinical Teaching ....................................... 11
2.3 Involvement of RNs in Clinical Teaching ............... 12
2.4 Knowledge of RNs in Clinical Teaching ........................................ 14
2.5 Attitudes of RNs Towards Clinical Teaching .................................. 17
2.6 Workload ..................................................................................... 18
2.7 Incentives ..................................................................................... 19
2.8 Conclusion ..................................................................................... 19

CHAPTER THREE
3.0 Research Methodology ................................................................. 21
3.1 Introduction .................................................................................. 21
3.2 Study Design ............................................................................... 21
3.3 Study Setting ............................................................................... 21
3.4 Study Population ......................................................................... 22
3.5 Sample Selection ......................................................................... 22
3.5.1 Eligibility Criteria ................................................................ 22
3.6 Sample Size ................................................................................ 22
3.7 Operational Definitions ............................................................... 23
3.8 Data Collection Tools ................................................................ 23
3.8.1 Validity ................................................................................. 25
3.8.2 Reliability ............................................................................. 25
3.9 Data Collection Technique ............................................................ 25
3.10 Pilot Study .................................................................................. 26
3.11 Ethical Consideration ................................................................. 26

CHAPTER FOUR
4.0 Data Analysis and Presentation ..................................................... 27
4.1 Introduction .................................................................................. 27
4.2 Data Processing and Analysis ....................................................... 27
4.2.1 Data Analysis ....................................................................... 27
4.3 Data Presentation ......................................................................... 28
4.3.1 Socio-Demographic Data ....................................................... 29
4.3.2 Involvement of RNs in Clinical Teaching of Nursing Students ....... 31
4.3.3 Knowledge of RNs in Clinical Teaching of Nursing Students ....... 37
4.3.4 Attitudes of RNs Towards Clinical Teaching .............................. 44
4.3.5 Questions on Workload and Clinical Teaching ......................... 51
4.3.6 Questions on Incentives and Clinical Teaching ......................... 52
4.3.7 Workload and Clinical Teaching ............................................. 53
4.3.8 Incentives and Clinical Teaching .......................................................54
4.3.9 Relationships of Dependent Variable and Independent Variables ........56

CHAPTER FIVE
5.0 Discussion of the Findings ................................................................. 63
5.1 Introduction .................................................................................... 63
5.2 Sample Characteristics ................................................................. 63
5.2.1 Demographic Characteristics of the Respondents ....................... 63
5.3 Involvement in Clinical Teaching of Nursing Students ..................... 64
5.4 Knowledge on Clinical Teaching of Nursing Students ....................... 66
5.5 Attitudes Towards Clinical Teaching of Nursing Students ................ 70
5.6 Workload and Clinical Teaching of Nursing Students ....................... 74
5.7 Incentives and Clinical Teaching of Nursing Students ....................... 75
5.8 Relationship of the Variables .......................................................... 76
5.9 Limitations of the Study ................................................................. 77
5.10 Implication to Nursing ................................................................. 77
5.10.1 Implication to Nursing Practice ............................................... 77
5.10.2 Implication to Administration .................................................. 78
5.10.3 Implication to Nursing Education ............................................. 78
5.10.4 Implication to Nursing Research ............................................. 78
5.11 Conclusion and Recommendations .............................................. 79
5.11.1 Conclusions ........................................................................... 79
5.11.2 Recommendations .................................................................. 80
5.11.3 Dissemination and Utilization of the Findings ......................... 81
References ......................................................................................... 82
APPENDICES
Appendix i Information Sheet for Participants .................................91
Appendix ii Consent of Participant .................................................93
Appendix iii Questionnaire .........................................................94
Appendix iv Timeline .................................................................102
