

**FACTORS AND THE NATURE OF LOW READING ACHIEVEMENT AMONG
GRADE TWO PUPILS: THE CASE OF SELECTED SCHOOLS IN MPIKA AND
MBALA DISTRICTS**

BY

STANLEY MWAMBAZI

**A DISSERTATION SUBMITTED TO THE UNIVERSITY OF ZAMBIA IN PARTIAL
FULFILMENT OF THE REQUIREMENTS FOR THE AWARD OF THE DEGREE OF
MASTER OF EDUCATION IN LITERACY AND LEARNING**

THE UNIVERSITY OF ZAMBIA

AUGUST 2011

DECLARATION

I, Mwambazi Stanley, declare that this dissertation is my own work and has not been submitted for a degree award at any other university.

Name:.....

Signed:.....

Date:.....

CERTIFICATE OF APPROVAL

This dissertation by Mwambazi Stanley is approved as partial fulfillment of the requirements for the award of the Master of Education (in Literacy and Learning) degree of the University of Zambia.

DEDICATION

To my beloved family: my wife and children, who, in my absence endured, tolerated but lived with hope. To my late mother, Beatrice, who, is departed to unknown worlds. Though departed to unknown worlds, her encouragement to study still lives on, and to Uncle Robert, also departed, whose good reading habits are always an inspiration.

ACKNOWLEDGEMENTS

I would like to thank wholeheartedly all the individuals, officials and organizations that assisted me and ensured that my study was a success. I would like to thank the NOMA Project through the Coordinator, Dr J. R. Luangala, for giving me a scholarship to enable me to study for the Master's qualification, and Dr A. Cheyeka, my supervisor, for his valuable guidance and continued support during my study.

I would also like to thank the NOMA Programme lecturers for their teaching, support and guidance during the programme, and Mr. Everisto Mubanga, a teacher, and my assistant, for his good supportive work.

To the Provincial Education Officer, and the District Education Board Secretaries for Mpika and Mbala districts, Northern Province for allowing me to carry out the study in their schools and districts, and Dr Akakandelwa, UNZA Veterinary and main libraries, for his computer and information technological guidance and support.

ABSTRACT

The study aimed at exploring the factors and the nature of the low reading achievement among grade two (2) pupils. Sixty grade two (2) pupils, thirty girls and thirty boys, comprised the samples while six basic school Head teachers, six School In-service Coordinators (SICs) and seventy-six grade two teachers were the respondents. The respondents and the samples were drawn from selected basic schools in Mbala and Mpika districts of the Northern Province of Zambia.

The instruments used to collect data include the Basic Skills Assessment Tool (BASAT), questionnaires, the Interview Guide, and the Lesson Observation Form (LOF). Test results of the study confirm that grade two (2) pupils in target schools were not able to read Zambian Language and English according to their grade level. The related Chi-square tests which were done on the test results from BASAT show that there was no significant difference in performance among the six basic schools.

The study revealed that grade two pupils were not able to read according to their grade level due to absenteeism; shortage of suitable teaching/learning materials; shortage of teachers particularly those trained in PRP methodologies; large classes; poor family and educational background; poor and inadequate infrastructure; pupils not breaking through in grade one; inadequate time allocated for literacy/reading lessons; and unfamiliar language of instruction.

Basing on the findings of the study, recommendations were made to the relevant authorities of the education system. The recommendations include: Adequate appropriate teaching/learning materials for literacy/reading in English should be continually supplied to basic schools; grade two teachers should be closely supervised and supported, and should be encouraged to establish closer links with learners' homes; teachers of the first two grades of lower basic section should be adequately trained in NBTL and SITE methodologies in order to ensure pupils who do not break through in grade one are assisted to read in grade two; more teachers should be deployed so that there should be two teachers per lesson in grades one and for adequate supervision of the many learning activities in NBTL and SITE; and construction of school infrastructure should be increased and should be more equitably distributed.
